Instructions for BitFitter and BumpaFitter

Remove spring from chute.

Load Bits or Bumpers with the plastic holder still in place into chute with the Bit or Bumper opening toward front.

Hold spring on top of bits and carefully remove plastic holder. Lock spring in place.

Push forward with thumb until bit or bumper is exposed.

Once exposed squeeze down on thumb to spread bit or bumper.

Insert opened bit or bumper between beak and into the nostrils, dip BitFitter down as you release pressure.
